Možnosť žltnutia bielej povrchovej úpravy. Drevo je prírodný produkt, jehož žilovanie, štruktúra a farba podliehajú kolísaniu v dôsledku rastu, lokality a klímy. Časom sa navyše odtieň farby dreveného povrchu mení pod vplyvom svetla a tepla. Tento prírodný proces starnutia ovplyvňuje všetky typy dreva v menšej alebo väčšej miere.

Drevo nie je odolné voči svetlu. Pôsobenie slnečného svetla, ako aj rozptýlené denné svetlo vo vnútri miestností, prispieva najviac k zmene farby.

Miera zmeny odtieňa farby závisí nielen od uplynutého času, ale aj od umiestnenia nábytku.

Neviditeľné časti ako napríklad rámy, dno zásuviek, dosky podporujúce rám atď., nie sú maľované tak ako zvyšok postele.

Všetky skrutky a vkruty prosím vkrúcajte opatrne a pomaly, aby ste predišli praskaniu.

NESKRUTKUJTE kovania blízko hrán! (TO SA TÝKA HLAVNE ZÁSUVIEK).

POZOR! Produkt môže po zostavení vyvíjať zápach až 72 hodín.

There is a possibility of yellowing of the coating of white coloured beds.

Wood is a natural product, whose natural grain, texture and colour are subject to fluctuations associated with growth, location and climate. Moreover, hue of the wood surface varies over time as a result of light and heat.

This natural process of aging is subject to greater or lesser extent on all types of wood. Wood is not resistant to light. Sunlight as well as diffused light inside the room contribute the most to colour change. The degree of changes to the shade depends not only on the passing of time, but also on placement of the furniture.

Invisible elements such as slats, frame supporting the slats, bottoms of drawers, etc. are not painted as the rest of the bed.

All bolts and screws are to be screwed gently and slowly to avoid damaging the panels by cracks. Do not screw fittings close to the edges.

ATTENTION!

After assembling, please wipe the bed with a damp cloth. The product might give off a strong scent of paint after assembling, usually up to

72hours.
